To: Francielle Alves Vargas <francielleavargas@usp.br>

To Francielle Alves Vargas,

The UK government's Metascience Unit and the University of Sussex are keen to receive your expert assessments on the novelty of selected publications within your expertise.

We have matched your work (Contextual-Lexicon Approach for Abusive Language Detection) as relevant to at least one publication in our project, which we would like you to assess.

Sharing your expertise is quick (the median time is 6 minutes per publication), and is crucial to our research project. Your responses will be combined with those of other experts to create a major repository of novelty evaluations at unprecedented scale. Findings will be presented only at the aggregate level and will help inform the development of policy on research evaluation. We hugely value your contributions via this personalised link.

Follow this link to the survey:
